designer packs

Choosing the right Kitchen Sink and Tap can create a statement and focal point in any kitchen. The Designer Pack Collection provides more ways to personalise the kitchen area.

Choose from a wide range of Sink and Tap combinations along with complementary bespoke accessories. To customise your kitchen sink and tap choose any DESIGNER PACK SINK (Sink and Bespoke Accessories)....

Then add your choice of any DESIGNER PACK TAP to provide the finishing touch to create your bespoke DESIGNER PACK (Sink, Tap and Bespoke Accessories).

Throughout this brochure look out for the Designer Pack logo.

This indicates savings are available on this sink when linked with one of the Designer Pack Taps. Contact your local retailer to find out more and request your copy of the Designer Pack Brochure.

Astraclean

Return your granite composite sink to it's original look....

ASTRACLEAN Composite Sink Cleaner

Astraclean is a specialist cleaner formulated to breakdown limescale on granite composite sinks.

Astraclean....

- Dissolves limescale
- Removes grease and other food substances
- Kills germs and bacteria on contact
- Smells fresh
- Suitable for use on ceramic & stainless steel sinks
- Fully biodegradable to European standards

Only £17

Code: ASTRACLEAN
Size: 250ml handy trigger spray
Telephone: 01274 475 160

why choose Astracast?

Astracast is recognised as a market leader in the manufacture of kitchen sinks, taps and accessories and have been manufacturing stainless steel and composite sinks for more than 25 years.

INNOVATION, DESIGN AND PERFORMANCE ARE OUR TRADEMARK FEATURES

In order to sustain our position as market leader, we continuously strive to develop products and solutions that lead the field.

With our industry leading team of designers, engineers and craftsmen we inspire and innovate, creating stunning visual and practical solutions for today's homes.

HIGHEST QUALITY

Regardless of the material and model, you can be assured of the highest quality. Our commitment to design and investment in manufacturing has been acknowledged with the award of ISO9001:2008. This international standard reflects high levels of design, development, manufacture and quality assurance, guaranteeing consistent high standards throughout the entire range.

ASTRACAST LIFETIME GUARANTEE

All Astracast Studio collection sinks have a comprehensive lifetime guarantee which covers the sink against the unlikely event of any material or manufacturing defect.

This guarantee is just one part of Astracast's commitment to total quality, assuring you that your Astracast sink will give you the highest level of performance and lasting good looks for years to come.

LIFE TIME GUARANTEE

IMPORTANT: This does not affect your statutory rights. Our obligation under the guarantee is to the original purchaser only – and may not be transferred.

All Astracast products comply with the UK Building Regulations and product safety requirements.

Pop-up covered waste system

Patented* innovation that will change the look of your sink!

Improve the look of your sink with a covered pop-up waste!

The pop-up covered waste system provides a more contemporary alternative to traditional designs. It has a stainless steel canopy which incorporates an easy-to-use push-up/down mechanism. The internal soft basket membrane is hygienic and easier to clean than standard wastes. **The waste system can be fitted to any sink with a standard 90mm aperture.**

* Pending in Europe and US.

Vantage Sink with Pop-up Waste

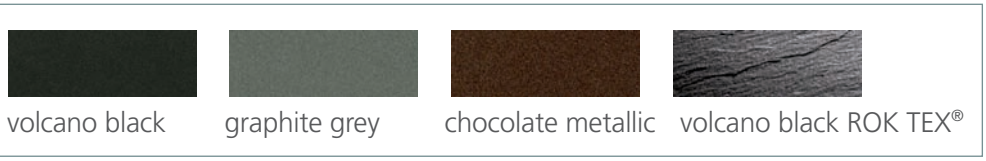
materials and care

A wide range of material, colours and accessories to complement your kitchen...

ROK TEX® is an industry first, pioneering new granite ROK® material. The surface is textured which gives the sink a beautiful contemporary slate effect. In addition metallic particles are added during the manufacturing process giving the sink a glisten which is intensified under light.

ROK® Metallic is a unique granite material whereby metallic effect particles are added during the manufacturing process. The resulting sink has striking good looks and complements contemporary kitchen environments. Available in three colours with all the material benefits of ROK®.



volcano black | graphite grey | chocolate metallic | volcano black ROK TEX®

Granite ROK® sinks are made from the most advanced material used in the manufacture of kitchen sinks. They are designed to combine hard-working performance with stunning good looks and natural textures of granite. With real quartz silica particles and a textured appearance ROK® sinks are available in a variety of natural colours.

opal white | sahara beige

Stainless Steel 18/10 sinks offer long lasting corrosion resistance and will withstand all common household acids and detergents. Our range features three stunning finishes, Classic Polished Steel, Linen – with its textured surface that offers stunning looks and durability and Brushed Steel – designed to complement modern appliance finishes.

polished | brushed | linen

Ceramic Sinks are individually hand-crafted and finished in fireclay. Cool and silky to touch, they have a hard non-porous surface giving excellent resistance to all commonly used chemicals and detergents and are extremely resistant to heat.

gloss white | gloss black

sink accessories

Many of our sinks have a wide range of useful and practical sink accessories which help turn your sink into a work centre, ideal for the hygienic preparation of food. **Please refer to the Technical Specifications at the rear of this brochure for full details of the accessories available.**

Grids and Drainers

Wooden Chopping Boards and Colanders

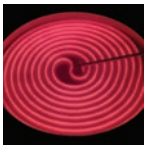
Glass Chopping Boards

All Astracast wooden chopping boards are FSC certified

ROK®… for the ultimate in performance

ALL ASTRACAST GRANITE SINKS ARE DESIGNED TO OFFER ULTIMATE MATERIAL PERFORMANCE, YET ARE EASY TO CLEAN AND ARE RESISTANT TO NEARLY ALL HOUSEHOLD CHEMICALS

LIFE TIME GUARANTEE



Resistance to Thermal Shock

Astracast sinks are designed and tested to withstand repeated cycles of hot and cold liquids without effect.

Impact and Scratch Resistant

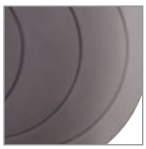
Astracast sinks are designed to resist everyday knocks and bumps in the most hectic kitchen, without chipping or marking. This ensures that the finish of the sink and the cleaning benefits that go with it remain for the products life span.

Resistance to Chemicals

Astracast's materials innovative, molecular structure ensures that all sinks are resistant to most commonly used household chemicals.

Resistance to Stains

The low material porosity denies staining agents the opportunity to penetrate the surface. Even the worst stains such as red wine and beetroot are easily wiped away with a cloth.



Water and Light Resistance

Astracast's materials are screened by world renowned colour laboratories – to ensure that Astracast sinks will not discolour in direct sunlight or water whiten over time.

waste disposal units

Our waste disposal units provide a quick, clean and environmentally friendly method for the disposal of food and kitchen waste. Powerful concealed grinding rings are housed well away from reach and all waste is ground into fine particles for efficient disposal into the drainage system. Models are BEAB approved and are easy to install.

To order:	Code:
Turbo 100	WD0001
Turbo 200	WD0002

Not suitable for use with ceramic sinks.

To ensure the sink co-ordinates perfectly with your kitchen, contact Astracast on: **01274 475 179** or email: **samples@astracast.com** and request up to two **FREE** colour granite samples manufactured from the material.

Or for information about our accessories contact Astracast on 01274 475 166.

Vanquish Tap with Contour 1.0 Bowl

Taps

FROM THE RUSTIC FARMHOUSE TO THE ULTRA MODERN PENTHOUSE APARTMENT THERE IS A TAP TO COMPLEMENT AND FINISH THE SETTING.

WITH A MYRIAD OF COLOURS, FINISHES AND ADDITIONAL FUNCTIONS, MAKE THIS AN UNPARALLELED FAMILY FROM WHICH TO SELECT YOUR PERFECT TAP

taps to complement your kitchen…

The perfect finishing touch with one of the most important accessories in any kitchen!

Astracast's stylish taps are in-line with most kitchen manufacturers gleaming finishes and will complement all kitchen styles – whether city slick, rural chic or country farmhouse, there will be a style of tap available to scintillate all tastes.

Our wide range of taps are available in either:-

Stainless Steel
Professional
Contemporary
Classic
Traditional
and not forgetting…
Springflow® – our fantastic water filtration system.

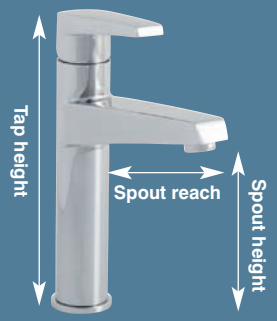
Vanquish Tap – Onyx 4070 Large Bowl (Inset)

Design and Innovation

From designer waterfall spouts to ceramic style traditional handles, every detail has been considered on each tap so that no matter what your kitchen style is, there is a tap to match. Our collection collates the taps by style and function which can help guide your choice. Use the colour-coded key features to help identify the features and benefits that would most complement your kitchen.

Understanding tap dimensions

The dimensions of the taps are located in the following technical specifications section, the measurements are in order of tap height, spout reach and spout height.



Colour Coding

Throughout this tap section each tap has its own individual colour-coded, key features. The colours aim to make it easier to pick out the features you want when making your choice of tap.

Tap features

- High Pressure
- Low Pressure
- Compression
- Single Flow
- Dual Flow
- Quarter Turn
- Pull-Out Directional Spray
- Swivel Body
- Progressive

Water Pressure

When choosing a tap you need to consider the water pressure available in your home. Cold water will be at mains pressure so is not usually a problem*, the pressure at which your hot water comes out the tap is vital and you must note those designs which require a high pressure to perform well.

Water pressure is measured in the unit bar (also termed 'head') which is the distance from a presumed water tank to the tap in height ÷10 (1 bar = 10 metres head of water).

If you have a pressurised water heater system then you will have a minimum amount of pressure (normally 1.8 bar), which is more than adequate to provide good flow through most taps.
If you have an un-pressurised system then you will need to calculate the head of hot water available to you before looking at our recommended minimum operating pressure and making your selection; – taking into consideration the route, any bends or diversions in the pipework could reduce the pressure. If needed, contact your plumber for professional advice.

Pumps to boost water pressure can be purchased from all good DIY and plumbing retailers, should your tap of choice require a greater pressure than your system offers.

**If you live on a higher floor or your water supply comes from a private supply then check the minimum hot/cold water supply suitability.*

LIFETIME FINISH GUARANTEE

* We offer a lifetime finish guarantee on our stainless steel taps.

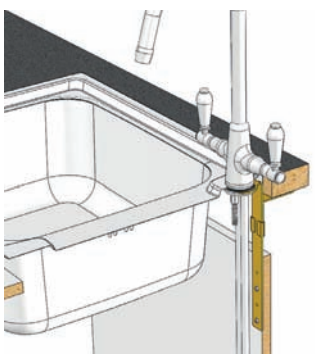
TAP SUPPORT BRACKET

Order code: TP0791 - £15



On occasion, depending on the type of sink and weight of the tap being fitted, a tap may require additional support. This product is designed to reduce the amount of sway of the tap when it is being used and to minimise any potential long term damage to sinks, taps or pipework.

This product is particularly applicable to the following conditions:

- The tap is fitted to a budget inset stainless steel sink.
- The sink is a single bowl model, or has a large drainer section.
- Taps using flexible connectors rather then rigid copper tail pipes.

Professional TP0764 – Polished/Volcano Black

Springflow® pure filtered water

CHOOSE TASTE

Making and keeping water safe means water companies have to use chemicals like chlorine that can significantly affect taste and odour. In addition natural sediment and other non-harmful contaminants can end up making our water taste and look anything but fresh.

Springflow®, however, transforms this into natural fresh tasting and odourless water that is a sheer pleasure to drink!

Springflow® filter taps combat odours and contaminants in your water supply to improve the appearance and taste of tap water, dramatically reducing chlorine by up to 99%.

Your Springflow Filter will reduce:

- **Chlorine**
- **Pesticides**
- **Solvents**
- **Sediment**
- **Dirt**
- **Rust**

To give you fresh, crystal clear natural tasting filtered water in your own home.

CHOOSE HEALTH

Water is an essential component of life. We can't live without it.

In the UK we take it for granted that we have safe drinking water on tap. Springflow® goes even further; combating herbicides, pesticides, insecticides and other organic chemicals – making it not just taste better but healthier too!

CHOOSE SPRINGFLOW®

You can't choose the quality or source of your tap water, but with a Springflow® filter tap you can transform your normal mains supply into fresh, natural tasting filtered water – at the touch of a handle.

Springflow® filter taps give additional protection against chemicals that may be present in the mains supply, reducing chlorine by up to 99% and filtering out sediment, dirt and rust whilst leaving the minerals essential to good health.

At the turn of a handle Springflow® taps dispense an endless supply of refreshing crystal clear water, it couldn't be easier!

CHOOSE SIMPLICITY

Our patented valve system means there is no need for additional handles or fuss – just push the cold handles back to dispense fresh filtered water.

Our filter, hidden away under the sink can be mounted in any position, horizontal or vertical – to best fit the space you have to offer. When it comes to changing the filter you don't need a new unit just open up the discreet casing and pop in a new cartridge. No mess, no hassle, just great tasting water.

- Springflow® enhances the taste of soft drinks, tea, coffee and even food,when used for cooking.
- Springflow® reduces the build-up of lime scale extending the life of appliances including kettles.
- Springflow® treats up to 2,500 litres of water, around six months use, with just one cartridge.

CHOOSE ECONOMY

A typical bottle of water would cost up to 30 x more than Springflow® filtered water, and with Springflow® there is no plastic waste.

CHOOSE DESIGN...

Our current range features a tap for every kitchen.
